

**Global Elections Security
APAC Roundtable**

Proposed Agenda

10:00 - 10:10 ACT: Welcome and Opening Remarks

By Fabio Fratucello, Chief Technology Officer for the Asia -Pacific & Japan region at CrowdStrike

10:10 - 11:20 Roundtable discussion

10:10 - 10:20 Topic Introduction

By Brian Cute, Capacity & Resilience Program Director at the Global Cyber Alliance

The aim of this discussion is to share experienced threats and actionable best practices in any of the following:

1. Core Electoral Process Systems: voting machines, software & hardware manufacturers, supply chain security, election management systems
2. Electoral Process Support Organizations: election commissions, electoral registers, and state, regional and local officials
3. Electoral Platforms Affecting Public Opinion: news organizations, political parties, social media platforms, donor groups

Discussions will be stirred around **Actionable Tools and Services** and will focus on - but not be limited to:

10:20 - 10:35 Technology, for example:

- Identification and Implementation of cybersecurity best practices such as rigorously securing email
- News verification and screening methodologies on search and social media platforms
- Experiences integrating commercial off the shelf hardware and software

10:35 - 10:50 Policy, for example:

- What distinguishes election environments in terms of data?
- What risk models can/should be applied by election managers and stakeholders?
- Identify schemes to notify cyber incidents
- Define transparency schemes around digital political advertisements

10:50 - 11:05 Collaboration, for example:

- How should the tension of election management independence and critical national infrastructure be navigated?
- Identify partnership models for government, nonprofits, and industry to share information and tools
- Roles and responsibilities for government, nonprofits, and industry in providing tailored and vetted tools and services to support election security

11:05 - 11:20 Resources and skills, for example:

- How can voters and students be equipped to distinguish trustworthy information from suspicious ones?

11:20 - 11:30 Conclusion and Closing Remarks

By Fabio Fratucello, Chief Technology Officer for the Asia -Pacific & Japan region at CrowdStrike
